Sir:

In response to the Office Action of April 3, 2000, please amend the above-referenced U.S.
patent application as follows:

IN THE CLAIMS:

Please cancel all of the original claims without prejudice or disclaimer of the subject matter
thereof, and substitute therefor the following new claims:

~~L-34.~~ An optical disk apparatus comprising:

a focusing means for focusing a light beam on a recording medium having first and second
information faces;

a moving means for moving a focal point of the light beam focused by said focusing means
in a direction substantially perpendicular to the information faces of the recording medium;

a light detecting means for detecting a reflected light of the focused light beam from the
recording medium;

a focus control means for detecting a focus condition of the light beam irradiating the
information faces on the basis of an output signal from said light detecting means, driving said
